

Using the T-charts, find the GCF (GREATEST COMMON FACTOR) for each pair of numbers, and use it to simplify the expressions:

$30 + 24$

$40 - 16$

$18 + 14$

Using a calculator, find the LCM (LEAST COMMON MULTIPLE) for the following numbers:

$5 \text{ \& } 15$

$6 \text{ \& } 5$

$4, 6, \text{ \& } 8$

$24 \text{ \& } 21 \text{ (Peter)}$
